**Product Data Sheet** 

Issued: February 25, 2011
POLYMER TYPE – Acrylic

# What is Scrub 'N' Shine?

SCRUB 'N' SHINE is a powerful detergent for polished floors that has a useful 2 in 1 action: it both cleans the floor and replenishes the surface with hard-wearing polish.

## **Key Benefits**

- ✓ Increases gloss of floors.
- ✓ 2 in I product that both cleans and polishes.
- Regular use will prolong the life of the film of polish on the floor and maintain a beautiful glossy surface.
- Designed for use with UHS buffers as well as 440-1000rpm machines
- Saves money by extending time between stripping operations.
- ✓ Low foaming.
- ✓ Removes scratches.

# How does it work?

SCRUB 'N' SHINE is used to wash the floor clean and simultaneously apply floor polish in the one step. The polish applied helps to replenish the floor's coating of floor polish which is gradually removed by foot traffic. The floor is then buffed and quickly yields a super-glossy shine.

The SCRUB 'N' SHINE film is very glossy and has excellent depth. It also resists black-marking and dirt pick-up and prevents powder problems.

#### For use on ...

All types of polished floors will benefit from application of SCRUB 'N' SHINE, including vinyl, timber, terrazzo, quarry and ceramic tiles. Unsealed floors such as sheet vinyl, tarkett and rubber will look better and be easier to clean with Scrub 'N' Shine.

## **Technical Data**

## **Properties**

COLOUR – Milky white liquid ODOUR – Faint ammonia odour pH =  $9.5 \pm 0.5$ 

#### **Environmental Care**

Product Code: SCRB

SCRUB 'N' SHINE conforms with all statutory environmental requirements. It is based on safe ingredients selected to perform efficiently so there is no waste or damage. SCRUB 'N' SHINE is non-

flammable and biodegradable. SCRUB 'N' SHINE containers will be cleaned and reused if returned to Agar Cleaning Systems Pty Ltd, significantly reducing plastic usage and waste. They can also be recycled.

First Certified: 30 April 1996 SAI Certificate No.: QEC7358

# **Application**

#### Autoscrubbing:

Dilute SCRUB 'N' SHINE to between I in 80 and I in 100 (use stronger rate for floors that are more heavily soiled). Scrub or mop the floor clean. Do not rinse after cleaning. Let dry then buff to a high shine. Any machine can be used

#### Damp Mopping:

Dust mop or sweep the floor. Dilute SCRUB 'N' SHINE to between I in 40 and I in 80. Mop floor clean. Do not rinse after cleaning. Allow to dry then buff to high shine.

#### Spray-buffing:

Dilute SCRUB 'N' SHINE to between I in I5 and I in 50. Spray the solution lightly over a square meter of floor then buff this area until it is dry. Continue this process over the whole floor. Finally, dust-mop the floor to collect the dust and dirt left along the edges.

Agar Cleaning Systems maintains Safety Data Sheets (SDS) on all of its products. These sheets contain information that you may need to protect your employees and customers against health or safety hazards associated with our product. Agar Cleaning Systems recommends that you obtain a copy of the respective SDS sheet prior to using this product. The information in the Product Data Sheet is based on data we believe to be reliable. It is offered in good faith, but without guarantee, as conditions and methods of use of our product are beyond our control.
