

Product Data Sheet

Product Code: SEQ

Issued: July 7, 2020

What is Sequal?

SEQUAL is a powerful cleaner for toilets and urinals. It is a thickened product that clings to vertical surfaces. SEQUAL has been specially formulated to be environmentally preferable.

Key Benefits

- ✓ New thick formula clings to steep surfaces for prolonged soil attack.
- ✓ Excellent day-to-day toilet cleaning performance.
- ✓ Environmental credentials externally audited and approved by Good Environmental Choice Australia.

Environmental Care

SEQUAL has been made from ingredients that have been chosen to give the following properties:

- ✓ Highly biodegradable surfactants
- ✓ pH mildly acidic
- ✓ Phosphate-free
- ✓ Non-flammable

SEQUAL contains:

- ✓ Surfactants that are derived from naturally renewable, regrowable resources (such as coconut and palm oils) together with food acids (such as citric acid).
- ✓ Cosmetic-grade blue dye.
- ✓ Minimal VOC's (volatile organic compounds).
- ✓ No toxic, harmful or ecologically suspect ingredients; no ammonia, glycol ethers, nonyl phenol ethoxylates, free caustic, chlorine, heavy-metal sequestering agents, phthalates or musk perfume ingredients.

See page 2 for Disposal Information.

How Does It Work?

SEQUAL's special formula will dissolve rust but will not affect stainless steel, even during periods of prolonged contact. The high viscosity formula allows SEQUAL to cling to vertical surfaces, extending exposure time for a cleaner result.

For Use On...

SEQUAL is a thickened, mild-acid cleaner for toilets, urinals, tiled washroom floors, walls, baths, basins and shower recesses. It dissolves all types of deposits from porcelain, ceramic and stainless steel surfaces, and leaves surfaces perfumed with a eucalyptus fragrance.

Caution

Acid-based cleaner. Avoid contact with skin and eyes. Because it is an acidic product, SEQUAL is not suitable for use on marble, terrazzo, formica or laminex surfaces. (Even a slice of lemon can damage these surfaces.) NEVER MIX SEQUAL with other chemicals. Never mix with BLEACH.

Technical Data

Properties

- COLOUR – Transparent blue liquid
- ODOUR – Eucalyptus fragrance
- pH = Undiluted pH is 2-3
- FOAM – Thick foam with good foam stability
- VISCOSITY – Thick liquid

Colour Coding

Product identification is made easy with the Agar Colour Coding system. We have 11 different categories of

product that are identified by colour and number. The product itself has this colour. Also, the colour and number are shown:

1. On the bottle label as supplied.
2. On the matching Dispenser Spray Bottle.
3. On the product chart for Colour Coded Cleaning.

This system has benefits of reducing the chance of using the wrong product, making compliance and staff training easy, showing that the correct products are being used and providing information about usage, dilution and first aid.

Product	Code Colour	Code Number	Type
SEQUAL	Dark blue	4	Toilet and bathroom cleaners

SEQUAL is a Colour Code 4 (dark blue) product.

Agar Cleaning Systems maintains Safety Data Sheets (SDS) on all of its products. These sheets contain information that you may need to protect your employees and customers against health or safety hazards associated with our product. Agar Cleaning Systems recommends that you obtain a copy of the respective SDS sheet prior to using this product. The information in the Product Data Sheet is based on data we believe to be reliable. It is offered in good faith, but without guarantee, as conditions and methods of use of our product are beyond our control.

Product Data Sheet

Product Code: SEQ

Issued: July 7, 2020

Health

Concentrated Sequal is classified as hazardous according to the criteria of Safe Work Australia. It is irritating to the skin and causes serious eye damage. **Sequal becomes non-hazardous when diluted to 1 in 13 (7.6%) in water.**

Please refer to the Safety Data Sheet for more information. SEQUAL is not classified as Dangerous Goods according to the criteria of the Australian Safety and Compensation Council (ASCC). It contains no ingredients that are classed as Toxic. Please refer to the Safety Data Sheet for more information.

Quality

The design, manufacture and supply of all Agar chemical products is controlled by the Agar Quality Management System which is registered and externally audited by SAI Global as complying with the requirements of AS/NZS ISO 9001 "Quality Management Systems – Requirements".
First Certified: 30 April 1996 SAI Certificate No.: QEC7358

Application

Toilets:

- Pour 60 mls* of SEQUAL into bowl and scrub with nylon brush. Flush the toilet after cleaning.

Urinals:

- Apply neat* SEQUAL to surface and scrub. Leave for five minutes to activate, then flush.

Showers and baths:

- Apply neat SEQUAL for the first time. Brush the product over all surfaces then leave for 2 minutes to activate. Rinse off. Use SEQUAL at 1 in 5 for regular cleaning.

*SEQUAL can be diluted 1:1 parts water for regular cleaning.

Disposal Information

1. Used solutions -

Used Solutions of SEQUAL should be poured into a drain or trough that leads to the sewer system or a septic tank. These systems have a method for treating and breaking down the waste. Used solutions of detergent should not be poured into stormwater drains or down driveways as these drains are designed for rain water and ultimately lead to the local river system. Although SEQUAL has a low aquatic toxicity, detergents in general are not good for aquatic wildlife.

2. Unused product -

It is best to keep the product and use it up! If this is not possible, try to give it to someone who can use it. (Make sure the product is in its original, labelled container). If there is no alternative but disposal, it is safe to pour modest quantities of this product down the drain (to sewer) with running water. Leave the cold tap running for a few moments afterwards as this dilutes the product and reduces the concentration in the waste water. Remember, do not mix different cleaning products together during disposal!

3. Empty packaging –

Bottles and drums -

Our 5L and 20L bottles and drums are made from HDPE (polyethylene) or PET which can be recycled. You can dispose of these containers via the kerbside collection program or other recycling system. SEQUAL containers will be cleaned and reused if returned to Agar Cleaning Systems Pty Ltd, significantly reducing plastic usage and waste.

Cardboard cartons -

Our cartons contain a minimum of 70% of recycled cardboard and/or paper. Used boxes should be flattened and recycled in OCC (old corrugated cardboard) or mixed waste paper recycling programs.

Available in: 5L, 20L

Dispensing Accessories:

750ml Squirt Bottle – Code D7S

Disc Top Cap – Code RIC

Hand Pump for 5L Bottle (30ml/Stroke) – Code DHP30

Hand Pump for 20L Drum (30ml/stroke) – Code DHP20

Tap in Cap 5L - Code DTC5

20L Drum Tap – Code DTAP

Tap in Cap 20L – Code DTC20
