

Product Data Sheet

Product Code: DS

Issued: December 10, 2019

What is Steel Shine?

STEEL SHINE is a water-based cleaner that polishes stainless steel and aluminium surfaces with a deep shine. Stainless steel panels around lifts, finger-plates, architraves and handrails can be kept glossy, clean and free of finger-marks and smears by applying a thin film of STEEL SHINE. This shiny film enables marks and smears to be wiped off easily with a soft cloth.

Key Benefits

- ✓ STEEL SHINE is water-based and safe to use
- ✓ STEEL SHINE cleans, polishes and protects metal surfaces
- ✓ STEEL SHINE makes daily cleaning quicker and easier

Technical Data

Composition

STEEL SHINE is an emulsion of pure, safe white oils and silicones in water.

Properties

COLOUR – White rich liquid
ODOUR – None
pH = 6.0 ± 0.5

Environmental Care

STEEL SHINE conforms with all statutory environmental requirements. It is based on safe ingredients selected to perform efficiently so there is no waste or damage. STEEL SHINE is phosphate-free, solvent-free, non-flammable and water-based. STEEL SHINE containers will be cleaned and reused if returned to Agar Cleaning Systems Pty Ltd., significantly reducing plastic usage and waste. They can also be recycled.

Quality

The design, manufacture and supply of all Agar chemical products is controlled by the Agar Quality Management System which is registered and externally audited by SAI Global as complying with the requirements of AS/NZS ISO 9001 "Quality Management Systems – Requirements".

First Certified: 30 April 1996
SAI Certificate No.: QEC7358

Colour Coding

Product identification is made easy with the Agar Colour Coding system. We have 11 different categories of product that are identified by

colour and number. The product itself has this colour. Also, the colour and number are shown:

1. On the bottle label as supplied.
2. On the matching Dispenser Spray Bottle.
3. On the product chart for Colour Coded Cleaning.

This system has benefits of reducing the chance of using the wrong product, making compliance and staff training easy, showing that the correct products are being used and providing information about usage, dilution and first aid.

Product	Code Colour	Code Number	Type
STEEL SHINE	brown	9	Stainless steel care

STEEL SHINE is a Colour Code 9 (brown) product

Application

- If the stainless steel is heavily soiled, it should be cleaned with a detergent such as METAL-MAX, NOVADET, HF Detergent or WIPEAWAY.
- Use STEEL SHINE neat (do not add water).
- Spray STEEL SHINE onto the metal and spread the product quickly over the whole surface with a cloth, applying it lightly and evenly.
- Allow the area to dry, then buff lightly with a clean, DRY cloth (not the applicator cloth).
- The steel will dry to a rich, glossy shine and will now be protected from fingerprints, staining and marking.

Agar Cleaning Systems maintains Safety Data Sheets (SDS) on all of its products. These sheets contain information that you may need to protect your employees and customers against health or safety hazards associated with our product. Agar Cleaning Systems recommends that you obtain a copy of the respective SDS sheet prior to using this product. The information in the Product Data Sheet is based on data we believe to be reliable. It is offered in good faith, but without guarantee, as conditions and methods of use of our product are beyond our control.
