

Refillable **D-LUX**

Dispensing System

Stylish - Convenient - Responsible

Expanded Range

D-LUX Refillable Dispensing System

Our new D-LUX lockable bracket has superior strength for improved durability and design.

The new bracket and 300ml pump bottles are tamper proof. These new bottles are clear with a modern and minimalistic designed label allowing your staff to easily see when they require refilling.

This system is designed for use with our new convenient 2L bulk refill pouches which are clearly labelled, easy to use, store and have 6 per carton.

The D-LUX dispensing system is environmentally responsible, dramatically reducing the use of plastic and wastage of products. Using liquid soap products lessens the build up of soap scum in bathrooms.
