

DAIRY POWER

Cleaning and hygiene solutions for the dairy industry

DAIRY HYGIENE PRODUCT RANGE

TEAT CARE SOLUTIONS

Dairy Power Masidyne

Iodophor teat sanitiser

Medicated formulation containing glycerine and lanolin. Glycerine 46g/L and lanolin 16g/L. Can be used as a teat dip or spray. Iodine aids in the control of mastitis while the glycerine and lanolin keep the teats in good condition.

CLEANING AND SANITISING SOLUTIONS – ACID

Dairy Power CB Acid

Heavy duty acid

Highly concentrated liquid acid cleaner formulated from a blend of phosphoric acid, wetting agents and effective in the removal of baked on milkstone and hard water deposits. Low foaming formula makes it suitable for use in all milking plants and vats as well as in autowash units where liquids are preferred.

Dairy Power Acid Powder

Powdered Acid

Dairy Power Acid Powder is a powerful acidic detergent specially formulated to remove deposits of hard water salts, denatured protein and milkstone. These deposits are not readily removed by caustic based detergents and if not removed can reduce performance of heat exchangers and provide a place where microorganisms can multiply. Dairy Power Acid Powder is a pink, crystalline, practically odourless powder.

Everywhere It Matters.

Advancing milk quality through industry-leading service and expertise

The quality of the milk that you produce is vital in maintaining the profitability of your dairy operation.

Made in Australia, ECOLAB offers a complete range of teat care sprays to protect your herd, along with cleaners and sanitisers that clean milking machines, pipes, vats, coolers and holding tanks that transport your raw milk at the dairy.

Our local support team includes dairy specialists, formulation chemists and application engineers who are all on hand, to help you optimise your dairy operation and support your day to day, dairy hygiene and animal health challenges.

When you partner with ECOLAB, you partner with a knowledgeable and experienced team of milk quality experts whose role it is, to help you supply the best quality milk possible.
