# SODIUM HYPOCHLORITE

## 10-12%

Custom Care Sodium Hypochlorite is an industrial strength hypochlorite solution. It is usually diluted heavily with water to produce a variety of solutions of available chlorine that can be used for cleaning, sanitizing and bleaching purposes.

Reference should be made to the Custom Care Sodium Hypochlorite Safety Data Sheet as this is a hazardous material that can cause serious skin burns and eye damage. Sodium Hypochlorite should never be mixed with other chemicals, only water.

When diluting sodium hypochlorite, it is always recommended to add the product to water, not the water to sodium hypochlorite.

### Sodium Hypochlorite:

- ✓ Sanitizes
- ✓ Kills mould
- ✓ Removes stains
- ✓ Always dilute heavily with water
- ✓ Biodegradable
- ✓ Cleans & Brightens Stainless Steel
- ✓ Value for money
- ✓ For domestic or commercial use
- ✓ Bathrooms, toilets, floors

# Sanitizes and Cleans

## Directions for Use:

Always dilute with water. For disinfecting against general liquid biological waste a dilution of 5000 ppm, or approximately 0.5% is required which is a dilution of 1/20 (500ml in 10 litres of water or 50 mls with 950ml water).

- Do not dilute with hot water, it is safer to use cold water.
- Do not mix with any other chemicals
- Mix in a well ventilated room
- It is not recommended to use sodium hypochlorite and dilutions in spray bottles.
- Use gloves and wear protective eyewear when preparing chlorine (sodium hypochlorite) solutions.

## PHYSICAL AND CHEMICAL PROPERTIES :

### SPECIFICATIONS
