

What is Florprep?

FLORPREP is brilliant at what it does - a focussed and highly effective cleaner especially designed for scrubbing back floor sealer films prior to recoating with more polish.

Correct use of Florprep for repeated re-coating cycles can dramatically extend the period before a full strip is needed, saving on labour, chemicals and waste solutions over the life of the floor.

Key Benefits

- ✓ FLORPREP removes dirt and discoloured floor polish
- ✓ It is fast and effective
- ✓ FLORPREP is low-foaming
- ✓ FLORPREP is free-rinsing

How Does It Work?

FLORPREP is a concentrated cleaner especially formulated for scrubbing-back floor polish films prior to recoating. Before a floor is recoated with fresh polish, it is vital that all traces of dirt and spillages are removed so that dirt is not trapped under the new coating. Often, the topcoats on the floor will also have been scratched up and these worn coats should also be "cut" off the floor, leaving a clean, smooth base for the new coats to go over. According to the condition of the floor you can adjust the cleaning intensity and amount of 'cut back' by varying the dilution rate. FLORPREP is the best product for successfully achieving this goal.

For Use On...

Floors sealed with Agar water-based acrylic floor sealers which are due for re-coating.

It doesn't really matter what the floor underneath is actually made of, as long as the sealer coating is intact, with scratches and scuffs removed, and is compatible with the new sealer to be laid.

Care must always be taken with timber floors to make sure the floor is not flooded with solution. Over-wetting a timber floor can cause swelling and permanent damage.

Technical Data

Composition

Grease-cutting solvents, polish removing agents, surfactant blend for attacking dirt and fatty soils, builders for suspension of soil, water. Supplied as a concentrate intended for dilution prior to use.

Properties

- COLOUR – Orange liquid
- ODOUR – Slight
- pH = 12.5 ± 0.5
- FOAM – Low foam, unstable

Environmental Care

FLORPREP conforms with all statutory environmental requirements. It is based on safe ingredients selected to perform efficiently so there is no waste or damage.

FLORPREP is based on biodegradable surfactants and is water-based. FLORPREP containers will be cleaned and reused if returned to Agar Cleaning Systems Pty Ltd., significantly reducing plastic usage and waste. They can also be recycled.

Quality

The design, manufacture and supply of all Agar chemical products is controlled by the Agar Quality Management System which is registered and externally audited by SAI Global as complying with the requirements of AS/NZS ISO 9001 "Quality Management Systems – Requirements".

First Certified: 30 April 1996

SAI Certificate No.: QEC7358

Application

- Firstly sweep up any dry soil and dust, and remove spillages so there is no remaining dirt which could be trapped under the new coating.
- By regulating the dilution rate and pad colour, it is possible to scrub back lightly, moderately or heavily, to suit the condition of the floor and the desired end-result.

Guidelines for use:	Dilution	Pads
Light scrub	1 in 40	Red or blue pads
Moderate scrub	1 in 30	Blue or green pads
Heavy scrub	1 in 20	Black pads

- You can cut-back with FLORPREP using either a swing buffer or an auto-scrubber, equipped with the appropriate coloured pads. This can be done instead of the usual daily clean.
SWING BUFFER: After mopping the solution onto a pre-determined area of the floor, use the swing buffer to scrub the floor evenly and thoroughly.
AUTO-SCRUBBER: Fill the supply tank with a diluted FLORPREP solution, and proceed to scrub the floor slowly laying plenty of solution. If the floor needs a heavy scrub, you may lay the solution with the squeegee raised/vacuum off, and then return to scrub again and collect the solution a few minutes later.
- Give the floor a final rinse to remove all traces of the dirt and old polish removed by the process.

Agar Cleaning Systems maintains Safety Data Sheets (SDS) on all of its products. These sheets contain information that you may need to protect your employees and customers against health or safety hazards associated with our product. Agar Cleaning Systems recommends that you obtain a copy of the respective SDS sheet prior to using this product. The information in the Product Data Sheet is based on data we believe to be reliable. It is offered in good faith, but without guarantee, as conditions and methods of use of our product are beyond our control.
