

Here is how to use Quickleen-S

Quickleen-S is an **everyday, multi-purpose cleaner and polish** for use in domestic and commercial kitchens and bathrooms. Designed specifically for the food preparation industry it works like magic on counter tops, Stainless Steel, Pots, Pans and any area where grease and oil are present. **Made in Australia from food safe, non-toxic ingredients.**

General Instructions for using Quickleen-S

We provide you with 100% active ingredients. No filler, no water, no fancy packaging.

Quickleen-S only works when it reacts with water! Therefore, to clean anything the surface should be damp and the powder applied with a damp cloth. Moisten the surface that you want to clean with water. Dab a damp cloth in the Quickleen-S powder. Rub over the surface until clean, rinse the surface off with clean water or a clean cloth and then wipe or buff lightly with a clean dry cloth. A damp cloth or Chux Microfiber or Wonder Cloth (even an old T-Shirt folded into a smaller square approximately 10 x 10 cm) works very well.

No gloves required and no toxic fumes to breath in!

Cleaning Metal with Quickleen-S

Removes Rust, Tarnish, Stains, Burn Marks, Cooking Oil, Grease and Grime from Stainless Steel, Aluminum, Alloy, Copper, Brass, Silver and Chrome.

Apply Quickleen-S with a damp cloth, rinse with water and wipe off with a clean dry cloth. It's that easy! On hard to clean areas or areas with heavy build up - as with any cleaner - just use more product on the damp cloth. Don't be afraid to add a bit more water to the surface (but don't put water into your container of Quickleen-S). **Ovens, racks, grills and cookers** can be easier to clean if the surface is still warm. (But NOT hot!) **Stainless Steel and aluminium pots, pans, trays and other cookware** all come up great, along with **tarnished silverware, copper and brass**. Quickleen-S can also be used to remove **knife marks from dinner plates or stains in coffee/tea cups**.

On Stainless Steel areas such as **benches, counter tops, sinks, range hoods, splashbacks** etc. it is recommended that you follow the grain when using the product as rubbing firmly against the grain can be slightly abrasive. Quickleen-S also **easily removes rust from any stainless steel rails, plate, chairs and tables frames** etc. The product also works well on **plastic chairs, rubbish bins, BBQ's, mag wheels, Bull Bars etc.**

Silver and Gold Polish

Quickleen-S is a fantastic non-toxic silver and gold polish. Just mix ½ Tsp. of powder into ½ cup of water in a container. Then let the powder settle out for a minute and use a clean cloth to dab into the liquid only! Rub the tarnished areas with the damp cloth until they are clean and then buff lightly with a clean dry cloth. It really is that simple. Use a soft toothbrush to apply to ***jewellery or intricate designs.***

Cleaning Glass with Quickleen-S

For ***regular cleaning of windows, mirrors and shower screens*** mix 1/4 of a level Teaspoon of Quickleen-S per litre of water. Use straight from the bottle or as a spray, shake frequently. Spray on-wipe off. Windows will dry streak free. For ***regular wipe downs of counter tops, splashbacks, cabinet doors etc.*** mix 1/4 of a Teaspoon per litre of water. Use out of the bottle or as a spray using the wipe on wipe off method. Shake frequently.

Cleaning Shower Screens and Grout with Quickleen-S

For ***Hard Stains, Soap Scum and Mineral Residue on Shower Screens and Glass*** use Quickleen-S powder undiluted with the normal wipe on wipe off method. **Please note** that Quickleen-S will **NOT** restore the surface if it is very old and has already been pitted. If you can feel the build-up of residue on your shower screen use 000 grade steel wool instead of a soft cloth to apply the Quickleen-S powder. The steel wool must be wet! To clean mould and mildew from the grout use straight powder and a semi-stiff brush.

Cleaning Tile or Vinyl Floors with Quickleen-S

When ***mopping floors*** you can add 1 level teaspoon of Quickleen-S for each 2 litres of warm water for great results. For ***hard stains*** use the Quickleen-S powder undiluted using the wipe on wipe off method. (Not recommended for Cork or Timber floors)

Boat, Jet Ski or Camper Cleaning with Quickleen-S

Use Quickleen-S on your boat, jet ski or camper to clean ***stainless, alloy, chrome, fibreglass, clear plastics and vinyl.*** Watch the video for examples of just some the areas where Quickleen-S can be used. www.youtube.com/watch?v=4BOwA-4sueM
